APR 24 2003  
TECHNOLOGY CENTER R3700

Sir:

In response to the Office action dated December 18, 2002, please enter the following amendments and remarks into the above-identified application for the Examiner's review and consideration.

In the Claims:

A marked up version of the rewritten claims, showing insertions and deletions is included in Appendix A. A clean set of all pending claims is attached as Appendix B.

Please amend the claims to read as follows:

19. (Twice amended) A bone plate cutting assembly for shearing by transverse forces a bone plate having a non-circular cross-section and a longitudinal axis, comprising:  
a first shearing element comprising  
a handle for manipulation of the first shearing element; and  
a first head attached to the handle and having a front face, a back face, and at least one outer surface, the first head having a slot through the front and back faces and extending from the outer surface towards an interior of the first head; and  
a second shearing element comprising  
a handle for manipulation of the second shearing element; and  
a second head attached to the handle and having a front face, a back face, and at least one outer surface, the second head having a slot through the front and back faces and extending from the outer surface towards an interior of the second head;  
wherein the first shearing element is separate and unconnected from the second shearing element and independently movable thereof and each slot has at least one bevelled
